Invest in your oral health

We look forward to seeing you at your appointment. We have instituted appropriate precautions consistent with health policy guidelines to help keep our patients and staff safe. Please keep the following in mind:

- Please come to your appointment on time. **Do not be early and do not be late.** This will allow us to limit the number of people in the office at one time and will allow time for us to properly clean, sterilize, and disinfect the office between patients. If you are late to your appointment, we will not be able to accommodate you. Keep in mind that because people may be avoiding public transit, traffic may be heavier so plan accordingly. **If you cancel or miss an appointment you may not be able to reschedule for some time.**
- You must wear a mask to the dental office and at all times in the office except during treatment.
- Try to come into the office alone if possible.
- Please bring your own pen for writing and signing forms.
- Open the front door with the handicapped button with something other than your hands.
- You will be asked to use our hand sanitizer upon arrival.
- We will take and record your forehead temperature with a non-contact digital thermometer upon arrival.
- You will be asked to complete a screening for COVID-19. The questions are mandated by the Ministry of Health. Please email our COVID SCREENING FORM back to us at **drtanen@rogers.com** the day before your appointment or bring the completed form with you if you are unable to email. This allows us to properly prepare for your visit and also is a record for contact tracing if needed. **If any of the answers to the screening questions (questions 2-5) are “yes”, we may not be able to see you at your scheduled appointment.**
- All magazines, toys, iPads, and tv remotes have been removed.
- Before you leave, use our hand sanitizer.
- Please call us if you experience any symptoms of COVID-19 within 14 days of your appointment.
